

Because Life Should Be Beautiful™

Rose List 2012

Save 20% off the retail price by ordering before December 1, 2011!

Discounts apply to prepaid orders ONLY.

Pre-ordered roses are supplied bareroot — all others are potted.

No matter how many years we have done this list, it is always exciting. The hybridizers are always trying to out-do themselves and this year is no exception. We have 51 new varieties on this list!

This year, the AARS Award Winner is the pale warm yellow Grandiflora called 'Sunshine Daydream' (pictured here).

As always, it is our intention to supply all roses listed, however, due to circumstances beyond our control some varieties may not be available. Remember, popular varieties sell out quickly—for best selection come in early.

Bold Type indicates 2012 AARS winner • Denotes new introductions for 2012 and new varieties added

Bonnie's Guide to Growing and Caring for Roses

This care guide is specific to the Bay Area. Most rose care instructions you see are written for colder climates, but it is not necessary to protect roses from freezing here. There are, however, some climatic variations within our own area to consider. West of the hills and anywhere along the water, temperatures will be very mild and humid, which means you should select roses that are fairly mildew resistant and that the petal count needs to be on the low side (20-30) so that the flowers will open. Roses grown in the hotter inland areas can have a higher petal count (30 and above) and the disease resistance factor can be less of a concern. Climatic variations aside, here are some general guidelines for growing roses:

- 1. SUN** - Lots of it, 4-5 hours minimum. Just remember, afternoon sun is hotter than morning sun and Danville sun is hotter than Oakland sun. Roses won't need as many hours where the sun is hotter.
- 2. WATER** - All roses need regular watering. Regular watering is deep, thorough and applied on a regular basis. How often depends on sun, wind and most especially the type of soil you have. Therefore it is necessary to water more often in Alameda's sandy soil than in Walnut Creek's adobe. Roses on a windy hill will need more frequent water than roses in a sheltered site.
- 3. FERTILIZER** - All roses perform better with a regular fertilization program. Having strongly stated that, I am now going to hedge on what to fertilize with. Everyone has their own personal formula. For the advanced grower, I have a Fertilizer Recipe which you can download from our website (www.orchardnursery.com) or pick up a copy next time you're in the store. Try it and let me know what you think. I welcome all feedback. Basically any balanced fertilizer with the middle # being the highest, such as **Master Nursery™ Rose Food** or **E.B. Stone Organics Rose & Flower Food** is fine as long as it is applied regularly, as directed on the package.

4. MULCH - All roses love an organic mulch applied around their roots. **Fir Bark Mulch, Paydirt or Bumper Crop** are all good to use as a mulch. Mulching does several things. It acts as an insulator keeping the soil cool and the moisture in. It acts as a weed control and the few weeds that do manage to grow through are easier to pull out. Most importantly, it improves the soil over time. Mulch should be spread around the plant about 2" deep, being sure to keep the main stem free of mulch and exposed to the air. To encourage early bloom, delay mulching until after the soil has been warmed by spring temperatures.

5. PESTS - All roses get pests—sad, but true. However, there are lots of solutions to choose from to control these pests and leave you with beautiful flowers. If you choose not to use chemicals to control pests, there are cultural practices and non-chemical means available. However, if you want perfect show/exhibition roses, then protecting them with horticultural chemicals may be your best choice.

A NOTE ON PLANTING ROSES PURCHASED FROM ORCHARD

When you purchase a rose at Orchard Nursery it will be in a paper pot. This enables you to plant your rose at any time. To plant your rose, dig a hole twice as wide as the pot and half again as deep. Amend the soil you have dug out by adding **Fir Bark Mulch, Paydirt or Bumper Crop** to make a 50/50 mixture. Make four slits in the sides of the paper pot. Add **Osmocote** slow release fertilizer or **E.B. Stone Sure Start**, and enough of the soil mix back into the hole so that the soil level of the rose is even with your garden soil when the paper pot is placed in the hole. Tuck remaining soil mixture around the outside edges of the pot, tamping it tightly in place. The lip of the paper pot will be protruding above the soil, this may be left to form a watering basin for the first year or it can be cut off. Mulch, as directed in #4 above, and water your newly planted rose thoroughly.

PEST	CULTURAL CONTROLS	EARTH FRIENDLY SPRAYS
Aphids	Rub off, hose off, aphid traps & other beneficials	Green Light Rose Defense, Bonide Insecticidal Soap, E.B. Stone Rose & Flower Spray
Beetles	Hand pick, water traps	Green Light Rose Defense, E.B. Stone Rose & Flower Spray
Caterpillars	Hand pick	B.T., Green Light Rose Defense, Bonide Insecticidal Soap, Spinosad
Curculio Beetles	Pinch and destroy damaged budshoot	Green Light Rose Defense
Spider Mites	Hose off undersides of foliage often	Green Light Rose Defense, Bonide Insecticidal Soap, E.B. Stone Rose & Flower Spray
Thrips	Hose off undersides of foliage often	Pyrethrin, Neem Oil, Bonide Insecticidal Soap, E.B. Stone Rose & Flower Spray
